Workshop

15 September 2021, kl. 15:00-16:30

Welcome to participate in the subsequent workshop. Here you get the opportunity to meet all panelists and the organizers behind Agenda: Sustainability. During the workshop, we will delve into the focus area of the webinar. We alternate mini-lectures with group work where different issues and problems will be solved in groups. There will be plenty of opportunity to raise your own issues and challenges that are central from your and your organization's perspective. Our experts will skilfully guide us through the workshop!

Limited number of participants - secure your place today!

Maximum number: 25 participants

About the webinar series – Agenda: Sustainability

In the transformation towards more sustainable organisations, sustainability issues have climbed high up on the agendas in both public and private sector. This transformation is indeed a challenge and calls for new mind-sets, business models, innovations and practices. Succeeding with this transformation is vital to solve the climate crisis and reduce social inequalities. We believe that joining forces, sharing ideas and innovations, as well as, starting new creative collaborations is the best way towards reaching the ambitious goals of e.g., Agenda 2030, EU Green Deal and The Sustainable Finance Platform.

Therefore, we launch Agenda: Sustainability – a webinar series where we invite actors from the private and public sphere to discuss with NGOs, authorities and researchers how to find efficient ways to succeed with the sustainability challenges we have high up on our agendas. Agenda: Sustainability is organised by Lund Institute for Sustainability Impact, the Chamber of Commerce and Industry of Southern Sweden, City of Lund and Region Skåne.
